PROJECT REQUIREMENTS

Nusuk Frontend Site development

- **Initialize Project:** Set up the project structure with HTML, CSS, and JavaScript folders/files.
- **Dependencies:** Set up necessary dependencies and libraries (if any, such as Bootstrap, jQuery).
- **Site Pages:** Create the structure based on the Figma design, Include navigation, hero section, features, testimonials, and footer, Structure the content including mission statement, team members, and history
- **Global Styles:** Define the global styles (e.g., fonts, colors, spacing) as per the design system in Figma.
- **Component Styles:** Style individual components (e.g., buttons, forms, cards) according to the Figma designs.
- **Animations and Transitions:** Add CSS animations and transitions to enhance the user experience.
- **Optimize Images and Assets**: Ensure all images and assets are optimized for fast load times.
- **Responsiveness:** Ensure the site is fully responsive and functions well across all devices, including PCs, laptops, and mobile devices.
